ISSA World Series Rules

ISSA Speed Skydiving World Series Rules

2019 Edition, Effective 1st March 2019

The Essence of Speed Skydiving

To compete for the best Meet Result and set Personal Best speeds. Personal Bests can only be set during a sanctioned ISSA competition and are published online on the ISSA Eternal Ranking. Only regular skydiving gear on sale is allowed to be used. No extra weight is allowed. One approved Speed Measuring Devices measures the vertical speed between Exit and 1.700 meters (5.577 ft) above the ground. The readings of the Speed Measuring Device is to be extracted and analysed using an approved Software.

1. Preface

Speed Skydiving is a skydiving discipline with a definition as simple as it gets and it is the fastest non-motorized sport on Earth. In essence, speed skydiving is a pure discipline where only one aspect counts - free fall speed. The speed achieved by human body in free fall is the function of two factors, body weight and body orientation. In stable, belly to earth position, terminal velocity of the human body is about 200 km/h (about 120 mph). Stable freefly head down position has a terminal speed around 240-290 km/h (around 150-180 mph). Further minimizing body drag and streamlining the body position allows the skydiver to reach higher speeds in vicinity of 480 km/h (300 mph). Achieving and maintaining high free fall speed is the goal of speed skydiving.

2. Terms and Specifications

Speed Measuring Device (SMD): Flysight by Bionic Avionics is the approved speed measuring device. Speed measurement is done by one SMD. Each competitor is issued with one official SMD for each jump.

Analyzing Software: Intervision Speedware is the approved software to extract the readings from the SMD and to analyse the recorded data. Intervision Speedware is a software product developed on behalf of the ISSA and is obtainable from the ISSA.

Speed Skydiving Competition Rules: an ISSA approved competition has to be run according to the currently applicable FAI/IPC Sporting Code and Competition Rules for Speed Skydiving and ISSA Speed Skydiving World Series Rules.

Meet Result: is the average of the total result divided by the number of completed rounds.

3. Competitions

3.1. Judging

A minimum of one Judge is required. The nominated judge must have at least a national Speed Skydiving judge rating.

A computer operator may run the data download according to the Speed Skydiving Competition Rules. The nominated judge validates and approves the results.

3.2. Technical & Safety

There is no special consideration for low pull since there is nothing that would encourage competitors to keep the speed beyond the measurement zone. However, low pulls may be subject to penalty according to the hosting dropzone rules.

No weights are allowed for the competition. Any not common modifications on gears are subject

to be reviewed by the race commission. If found dangerous or contravening rules this gear may be prohibited from use in the competition.

Once in effect for the season, speed skydiving rules may not be changed.

3.3. Download Team

The organizer provides a competent person who assists the nominated Judge in data downloading, documentation of the 'Measuring Device / Competitor Assignment' and the data backup.

3.4. World Series 2019

The ISSA World Series 2019 consists of 4 separate meets. The schedule is published on www.speed-skydiving.com. No additional meets will be added to the ISSA World Series Series 2019. In case a scheduled ISSA World Series meet cannot be hosted at the pre-designated dropzone, it should be relocated to a nearby dropzone within the same country.

3.5. World Series Results

World Series overall result is the sum of the two best meet results for each competitor regardless of number of meets completed (points = meet result of a single meet). If the competitor does not participate in some of the meets, the result for that meet(s) will be zero.

The competitor with most points is the winner of the World Series 2019 and declared the ISSA Speed Skydiving World Series Champion 2019.

3.6. Race Commission

Each participating country should be represented in the race commission. The race commission is composed of one athlete per country. The representative for a country with more than one participant will be drawn at random.

The race commission resolve conflicts that are not outlined in the Speed Skydiving Competition Rules. If not contradictory to the ISSA rules, FAI/IPC Sporting Code and Competitions Rules will be applied to all Speed Skydiving Competitions. The Race commission may not amend or change the rules, for example: changing the out of boundaries value.

3.7. ISSA Board 2019

The ISSA board is responsible for the Speed Skydiving World Series Rules and the annual Speed Skydiving World Series.

Core Members – in alphabetical order

Thomas Moritz Friess (GER)

Ken Hansen (SWE/NOR)

Arnold Hohenegger (AUT)

Christian Labhart (SUI)

Michael Lovemore (GBR)

Marco Wiederkehr (SUI) - Chairman

Organizer Representatives – in meet order

Paulo Alves – Portuguese Meet

Livio Piccolo (Tim Porter) – Italian Meet

Marco Hepp – German Meet

Grim Swinnen – Belgium Meet

4. Personal Bests & Records

Personal Bests can only be set during competition jumps. Personal Bests have to be approved by the ISSA. Personal Bests are published online on the ISSA Eternal Ranking.

National, Continental and World Records can only be set during a sanctioned FAI Event or a competition sanctioned by a National Airsport Control (NAC).

6. Summary of Changes 2019

Paragraph	Part	Change
	Essence of Speed Skydiving	Change to 1 SMD
2	Terms, Approved SMD Terms, Meet Result Terms, Out of Bounderies	Flysight new definition because change of measurement deleted because change of measurement
3.7	ISSA Board 2019	update organizer representatives

APPENDIX A: Template for Invitations

This template shows the minimum requirements for invitations and is standard for competition invitations.

Name of Competition: _____

Organizer: _____

Organized by: _____

Judge: _____

Download Team: _____

Location: _____

Arrival: _____

1st Competitor Meeting: _____

Competition starts: _____

Competition ends: _____

Award Ceremony: app. 1 hour after end of competition

Entries sent to: _____

Entryfee: _____

Entryfee includes: _____

Entryfee payback: _____

Requirements: _____

Competition: Speed Skydiving, 8 rounds, rules according to the currently applicable ISSA Speed Skydiving Word Series Rules and the FAI/IPC Sporting Code and Competition Rules for Speed Skydiving.

Trainingjumps: _____

Aircraft: _____
